

VR SESSION CHECKLIST

VR HARDWARE READINESS

- VR headset setup and fully charged.
- VR controllers charged and/or extra batteries on hand.
- Cleanser or Lysol wipes

VR USE-SPACE READINESS

- Arrive early – expect 15 minutes of class setup time.
- Determine the best casting solution and test your headset and any computer or AV equipment.
- Set VR use space / guardian.
- Ensure space is free of obstacles or other potential hazards. *Consider a seated option.*

DURING VR INSTRUCTION

- Select your VR training module.
- Facilitate the donning and doffing of the VR headset on users.
- Instruct users on VR training objectives.
- Manage group participation; provide opportunities to all.
- Ensure the safety of VR participants.
- VR participation is voluntary; if a user is having a bad time, have them remove the headset immediately.

AFTER VR SESSION

- Disconnect all cables and fully POWER OFF the VR headset.
- Pack VR headset, controllers, and all cables away in on-site storage or mobile carrying case.
- Distribute & collect VR training evaluation forms.
